See Sight Tours Income & Expense Dashboard Report

1 Introduction

This report explains the data cleaning, preparation, and dashboard creation process for the See Sight Tours Income and Expense dataset. The goal was to analyze tour activity, revenue, expenses, and location-based trends.

2 Dataset Overview

The dataset includes:

- Tour Date
- Format Date (Month-Year)
- Codes and Tour names
- City and Country
- Account Group (Revenue, COGS, Operating

Expenses) • Account description

- Amount (income or expense)

These columns help us understand when tours happened, where they occurred, and how much money was earned or spent.

3 Data Cleaning Steps

After importing the dataset into Power BI, the following steps were

done: • Converted data types:

– For Dates, Date type is used

– For Amount, Decimal Number is used

– For Text columns, Text type is used

• Fixed Tour Date by changing its locale to English (United States) so that the mm-dd-yyyy format was recognized.

• Split Format Date into Month and Year for use in monthly charts. •

Cleaned text formatting (Capitalized City, Country, and Tour names). •

Checked Column Quality to confirm no errors or missing values.

4 Dashboard Visuals

4.1 KPI Cards

At the top of the dashboard, KPI cards show:

• Total Tours

• Total Cities

• Total Revenue

• Total COGS

• Operating Expenses

4.2 Revenue by Country

A bar chart compares how much revenue came from each country. Canada appears as the highest revenue source.

4.3 Tours by Codes

A pie chart shows how many tours belong to each Code category.

4.4 Top 5 Most Visited Places

A simple horizontal bar chart shows the five tours with the most visitors.

4.5 Monthly Revenue

A column chart shows how revenue changes month by month. It clearly shows peak months.

4.6 Amount by Account Group

A donut chart shows the percentage of Revenue, COGS, and Operating Ex penses.

4.7 City Revenue Table

A table lists each City, its Country, and the Sum of amount(revenue,operating expense and cogs) earned there.

6 Conclusion

The dashboard gives a clear view of See Sight Tours financial and operational activity. It helps identify:

- Which countries and cities earn the most
- Which tours are most popular
- Revenue patterns across months
- Cost structure of the business
